

## Your 3-step daily care programme

In limited-edition sizes

Achieve beautiful skin in just 3 steps...

To pamper your skin daily  
**cleanse ... tone ... moisturise**  
with Dr.Hauschka natural face care products

Dr.Hauschka's rich skin care formulas contain plant-based and natural essential oils, high-grade plant waxes and moisturising extracts of medicinal herbs that support the skin's innate power to nurture and regenerate itself.

Experience this unique care concept today –  
your skin will thank you!

## Your 3-step face care programme for daytime

### Cleanse

#### Cleansing Milk

Dry, sensitive skin requires extra gentle cleansing.

Cleansing Milk contains conditioning Jojoba and Almond oil, fortifying Anthyllis and special cereal extracts that gently cleanse the skin, without disturbing its natural hydro-lipid layer. At the same time, the skin receives fortifying treatment that enhances its natural elasticity.

This creamy, tenside-free cleanser also gently dissolves away make-up, making it easy to remove.

The result is a soft, supple complexion.

**Tip:** If your skin is less sensitive and dry, it will benefit from Dr. Hauschka Cleansing Cream. This core cleansing product has a creamy almond base containing medicinal herbs that thoroughly cleanse and refine the pores, and leave skin feeling invigorated and refreshed.

### Tone

#### Facial Toner

The fortifying action of Dr. Hauschka Facial Toner stimulates the skin's natural powers and hydrating processes. Witch hazel and Anthyllis enhance its invigorating properties.

Sprayed on the face, neck and décolleté after morning and evening cleansing, this toner helps maintain the skin's natural balance and promotes a youthful radiance.

**Tip:** Dr. Hauschka Clarifying Toner provides regulating care for skin that is oily or prone to blackheads and inflammation.

### Moisturise

#### Rose Day Cream

The special properties of Rose Day Cream offer ideal protection for normal, dry and sensitive skin, as well as skin that is prone to dilated capillaries (couperose). They also promote the skin's natural capacity for regeneration. Sumptuous Rose oil and extracts of wild Rose hips harmonise the skin's functions, while Shea butter, Rose petal wax and Avocado extract prevent it from drying out.

**Tip:** For those requiring a less intensive formulation, Rose Day Cream has a sister product, Rose Day Cream Light, which has a lighter, less intensive formulation but delivers the same nurturing care.

#### Quince Day Cream

Environmental factors can weaken the natural defences of the skin, even at a young age. Quince Day Cream contains Quince wax to envelop the skin protectively without hindering the skin's natural processes. Extracts of Quince seeds and medicinal herbs retain the skin's moisture. The skin can better protect itself from external influences and its intrinsic powers are reactivated.

**Tip:** Quince Day Cream provides refreshing, moisturising care that is also ideal for men.
